## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### Specification

The disclosure is objected to because of the following informalities: Page 1, line 9 states "...cardiovascular account for a major portion of such deaths..." Cardiovascular what?

Appropriate correction is required.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20, 28-31, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Aita (US 5,472,795). Aita teaches a multilayer nanolaminate containing polycrystalline zirconia. The substrate or support (11) may be of any desired material including glass or plastic. Thin layers of zirconia are alternated with layers of alumina. Two or more layers are preferably alternately coated onto the support. A multiplicity of these layers would serve as bilayers. Other ceramics may be used such as nitrides and carbides (col. 2, lines 61-67; col. 3, lines 1-24). The ceramic layers have a thickness in the range of 30nm to about 1 micron (1000 nm) (col. 5, lines 35-51).

### Allowable Subject Matter

Claims 21-27 are allowed.

### **Response to Arguments**

Applicant's arguments filed December 26, 2001 have been fully considered but they are not persuasive. Applicant argues that Aita does not teach an intracorporeal device or a substrate for such a device. This amendment to the claims and the subsequent argument is considered intended use, does not structurally limit the claims, and is therefore not considered to distinguish the claims over the prior art.

Claims 6 and 30 were inadvertently not included in the rejection of Aita. However, claim 6 refers to the swellable material being a nitride. The rejection previously made makes specific reference to other ceramics being used such as nitrides and carbides (see page 4, last sentence, of the rejection sent September 26, 2001).

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
